P2

Started on	Tuesday, 25 August 2026, 1:06 PM
State	Finished
Completed on	Tuesday, 25 August 2026, 1:28 PM
Time taken	22 mins 6 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using the counter method.

```
void function (int n)
{
    int i= 1;
```

```
    int s =1;
```

```
    while(s <= n)
    {
         i++;
         s += i;
     }
}
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

For example:

Input	Result
9	12

Answer: (penalty regime: 0 %)

```
#include <stdio.h>

int main()
{
    int n;
    int i = 1;
    int s = 1;
    int count = 0;

    scanf("%d", &n);

    while (s <= n)
    {
        count += 3;
        i++;
        s += i;
    }

    count += 3;

    printf("%d", count);

    return 0;
}
```

	Input	Expected	Got	
✔	9	12	12	✔
✔	4	9	9	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.

State	Finished
Completed on	Tuesday, 25 August 2026, 4:49 PM
Time taken	4 mins 41 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using the counter method.

```
void func(int n)
{
    if(n==1)
    {
      printf("*");
    }
    else
    {
     for(int i=1; i<=n; i++)
     {
       for(int j=1; j<=n; j++)
       {
          printf("*");
          printf("*");
          break;
       }
     }
   }
 }
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer: (penalty regime: 0 %)

```
#include <stdio.h>

int main()
{
    int n;
    int count = 0;

    scanf("%d", &n);

    count++;  // if(n == 1)

    if (n == 1)
    {
        count++;  // printf("*")
    }
    else
    {
        for (int i = 1; i <= n; i++)
        {
            count++;  // i <= n

            for (int j = 1; j <= n; j++)
            {
                count++;  // j <= n
                count++;  // printf("*")
                count++;  // printf("*")

                break;
            }

            count++;  // i++
        }

        count++;  // final check of i <= n
    }
```

```
36
37      printf("%d", count);
38
39      return 0;
40  }
```

Started on	Tuesday, 25 August 2026, 4:50 PM
State	Finished
Completed on	Tuesday, 25 August 2026, 5:23 PM
Time taken	32 mins 50 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using counter method.

```
Factor(num) {
{
   for (i = 1; i <= num;++i)
   {
    if (num % i== 0)
       {
         printf("%d ", i);
       }
    }
 }
```

Note: No need of counter increment for declarations and scanf() and counter variable printf() statement.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer:

```c
#include <stdio.h>

int Factor(int num)
{
    int count = 0;

    for(int i = 1; i <= num; i++)
    {
        count++;

        count++;

        if(num % i == 0)
        {
            count++;
        }
    }

    count++;

    return count;
}

int main()
{
    int n;
    scanf("%d", &n);

    printf("%d", Factor(n));

    return 0;
}
```

	Input	Expected	Got	
✔	12	31	31	✔
✔	25	54	54	✔

	Input	Expected	Got	
✔	4	12	12	✔

Passed all tests! ✔

Correct

Time taken	15 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using counter method.

```
void reverse(int n)
{
   int rev = 0, remainder;
   while (n != 0)
    {
        remainder = n % 10;
        rev = rev * 10 + remainder;
        n/= 10;

    }
print(rev);
}
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer:

```c
#include <stdio.h>

void reverse(int n)
{
    int rev = 0, remainder;
    int count = 0;

    count++;
    count++;

    while (n != 0)
    {
        count++;
        remainder = n % 10;
        count++;
        rev = rev * 10 + remainder;
        count++;
        n = n / 10;
        count++;
    }
    count++;

    printf("%d\n", count);
}

int main()
{
    int n;
    scanf("%d", &n);
    reverse(n);
    return 0;
}
```

	Input	Expected	Got	
✔	12	11	11	✔
✔	1234	19	19	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
